SPEAKER GUIDELINES – How to upload/record your presentation

Presentation Format

We strongly recommend you to save your presentation in **Microsoft PowerPoint (PPT) or Adobe PDF** to guarantee your presentation will open successfully.

If you use MS PowerPoint, we recommend that you save your PowerPoint presentation using **.ppt- or .pptx-format** and not .pps or .ppsx. And in addition as PDF (not changeable format)

Images or Video Files

JPG images are the preferred file format for inserted images. PNG, GIF, TIF or BMP formats will be accepted as well. The resolution should be **between 72-200 dpi**. The size should not exceed **250KB**.

If you wish to include a video file in your presentation, the **MPEG-4 and WMV** formats should work with no difficulties.

Font and Style

Please use a minimum size of **16pt**. Suggested fonts: Arial, Tahoma, Calibri
Use of special fonts not included in MS-Windows 10 (English version) can cause the wrong formatting of your presentation.

We advise using **high contrast layouts**, for example light text on a dark background. We advise using the [master slide template](#) for your presentations.

UPLOAD your presentation and/or Pre-recording before the congress! (until 27 August 2021)

Take part in one **TECHNICAL TESTRUN!**

- Use same Devices (Laptop, Headphones, Microphones)
- Use same Network (Firewall!)
- Use same Environment (Light, Noise, Background)

will be used to livestream your presentation.

An outlook invitation with a zoom link to join your session as a speaker will be sent to you 48 hours before the congress starts.

A technician will be on-hand to welcome you in the Green Room before your session starts and assist during your session.

DURING YOUR SESSION:

Please respect the time limit for your presentation.

Parallel Sessions: 15 minutes (including 1 minute introduction of moderator and your speech)

Plenary Sessions: 25 minutes (including 1 minute introduction of moderator and your speech)
